

**Job title:** Cab Fitter and Fabrication Engineer (Equipment Preparation Centre)  
**Reports to:** Equipment Preparation Manager  
**Location:** Preparation Centre, Corby

---

**JOB PURPOSE:**

Based in our Preparation Centre workshops, you will carry out Cab Fitting, fabrication, routine maintenance and repairs to our short/long term hire machines and customer owned equipment. You will carry out the preparation of new, used and demonstration equipment to service our customer, sales and distributor base. Ensuring best practice with quality and professionalism are met always.

---

**CORE ACTIVITIES:**

- Fit Cabs (both full steel & those with PVC sides), and associated items, on all required equipment to a high standard. Fitting inclusive of wiring in wiper motors and installation of heaters etc.
- Carry out fabrication of brackets and other items required in the preparation centre.
- Completion of pre-delivery inspection on new and used equipment to pre-set standards prior to despatch to customer or dealer.
- Maintain and prepare demo fleet equipment as necessary for customer/dealer requirements.
- Maintain charge levels of traction batteries for the stock of electric powered equipment.
- Unloading of trucks, equipment, batteries, chargers etc that relate to the department
- Inspection of above equipment upon arrival and to produce a 'goods received note'
- To keep non-utilised/recoverable time to a minimum by liaising closely with the Equipment Preparation Manager, and planning workload.
- Submit detailed parts requisitions, providing all information required for the computer job records and ensuring the correct parts are ordered accurately and on a timely basis.
- To sometimes work without supervision by using own initiative, and to maintain Impact Handling standards of quality always.
- To ensure that any defective tooling or equipment is brought to the immediate attention of the Workshop Lead Hand or Equipment Preparation Manager.
- Project a good image of yourself and Impact Handling to the customer at all times, always wearing your supplied company uniform.
- Ensure that all documentation (including completed job sheets, time sheets, etc.) are fully completed as instructed and adhere to ISO9001:2000 procedure.
- Keep work area clean, tidy and organised in accordance with ISO14001 standards.

- Ensure that all documentation is passed to the office promptly.
- Always work safely in accordance with the Impact Handling Safe Working Practice and H&S standards.
- Attendance at Internal/External training courses at other locations to meet with Business and Health & Safety requirements.
- To perform any other reasonable duties that may be required from time to time within the scope of your knowledge, skills and ability
